

ALLEGiant PREMIUM CONNECTION (APC)

AS-APC PART OF OUR PROPRIETARY THREADED CONNECTIONS RANGE

ALLEGiant PREMIUM CONNECTION (APC)

The Allegiant Premium Connection (APC) is a custom-engineered coupled connection, built for applications requiring high pressure and tensile strength. Suitable for deep, high-pressure mine water lines and slicklines or paste lines, the APC Series prioritizes serviceability, ensuring long-lasting performance under extreme conditions.

APPLICATIONS

- **Paste Casing** - Delivers reliable paste flow and containment for efficient operations.
- **High Pressure Water Lines** - Withstands pressures typical in deep mine water lines, ensuring uninterrupted water transport.
- **Casing Between Levels** - Ideal for linking levels within a mine, supporting the infrastructure's stability and durability.

KEY BENEFITS

- **Exceptional Durability** - Engineered for high-pressure environments and extremely abrasive conditions, the APC Series maintains integrity even in demanding deep-well applications.
- **Reliable Performance** - Designed for repeated make and break cycles without compromising pressure tolerance or tensile strength.
- **Easy Installation** - The robust coupled connection allows for quick and secure engagement, reducing setup time and improving operational efficiency.
