

B SERIES

AS-B PART OF OUR PROPRIETARY THREADED CONNECTIONS RANGE

ALLEGIANT B SERIES THREAD

The Allegiant B Series Thread combines strength, adaptability and ease of use, making it an excellent all-round solution for industries that require a dependable, high pressure connection. With its durable flush joint and modified buttress design, the B Series delivers performance you can rely on.

AVAILABLE VERSIONS

- 3" OD to 9 5/8" OD
- Available in 3 different versions - Light (BL), Medium (BM), and Heavy (BH):
- Light (BL) - For applications needing a lighter casing, offering reliable strength with reduced weight.
- Medium (BM) - Balances strength and weight, suited for general-use applications.
- Heavy (BH) - Built for the most demanding environments, providing enhanced strength for thick-walled casing.

APPLICATIONS

- **Oil and Gas** - Provides a strong, secure connection for high-pressure oil and gas projects.
- **Mining** - Reliable for casing needs in mining, delivering strength in high-tensile applications.
- **De-Watering and Paste Lines** - Suitable for water and paste lines where durability and reliability are critical.

KEY BENEFITS

- **High Pressure and Tensile Strength** - Engineered for demanding applications, the B Series thread is designed to withstand high pressure and high tensile loading.
- **Customizable for Various Wall Thicknesses** - Available in Light (BL), Medium (BM), and Heavy (BH) wall options, providing flexibility for different operational needs.
- **Durable Flush Joint Connection** - Featuring a modified buttress profile, the B Series offers a robust, flush joint connection, ideal for small-diameter applications.
