

WT SERIES

AS-WT SUPPORTING THE INDUSTRY'S CONNECTIONS RANGE

WT SERIES

The **WT Series** casing is a flush joint thread that offers fast makeup and breakout. Designed for light to medium duty applications whilst balancing costs, the WT Series is suited for water bores and exploration drilling and is available in sizes **NWT (3 1/2") to ZWT (8 5/8")** along with custom sizes up to **10 3/4"**.

APPLICATIONS

- **Mining Drilling (WT Series)** - The tapered thread on WT casing facilitates quick handling and stronger connections, preferred when drilling into position.

KEY BENEFITS

- **Versatile Application** - Suitable for water bores, geotechnical and mining drilling needs, with options to support various drilling methods and site requirements.
- **Enhanced Strength and Compatibility** - Available in multiple steel grades, the WT Series can accommodate diverse operational demands with reasonable torsional and tensile strength.
