

# AS- EYE NUTS

**AS-EN-1T WLL (1.0 tonne)**

**AS-EN-2T WLL (2.0 tonne)**

## EYE NUT

The Allegiant Solutions Eye Nut is a versatile lifting component, engineered to meet the stringent demands of the mining and construction industries. Available in two Working Load Limits (WLL):

- AS-EN-1T WLL (1.0 tonne)
- AS-EN-2T WLL (2.0 tonne)

## APPLICATIONS

- **Lifting and handling within mining and construction sites**
- **Compatible with threaded ground reinforcement rods**

## KEY BENEFITS

- **Enhanced Safety**—Built for secure lifting, each eye nut is designed to reduce risk with clear, standardized identifiers and compliance with AS 4100:2020 Steel Structures and AS 4991-2004 Lifting Devices.
- **Optimized Lifespan**—Constructed to withstand up to 20,000 lifting cycles; inspect regularly to maintain peak performance and safety.
- **Full Traceability**—Each unit is fully traceable by part number, job number, and manufacturing date, ensuring accountability, easy tracking and inspection.
- **Robust and Reliable**—Suitable for demanding environments with a corrosion-resistant build and clear guidelines for safe operation
