

STORAGE AND INSPECTION RACKS

Allegiant Solutions offers a range of pipe storage and inspection racks engineered for secure, efficient storage and handling of piping and casing. Developed with both temporary site setups and long-term storage facilities in mind, these racks are certified for their holding capacity and designed to simplify handling, minimize space, and enhance site organization. Each rack provides dependable support and versatility, accommodating **pipe sizes from 2" to 26"**.

APPLICATIONS

- **Onsite Storage** - Ideal for securely holding pipes during active projects, allowing for safe and organized site management.
- **Long-Term Storage Solutions** - Supports long-term storage needs, offering a stable, weather-resistant option for yards and warehouses.
- **Optimized Handling** - The easy-access design enables smooth handling, reducing loading and unloading time.
- **Inspection of Tubulars**

KEY BENEFITS

- **Certified Safety and Reliability** - Certified designs ensure secure handling and storage, giving you peace of mind in both temporary and long-term applications.
- **Flexible Design Options** - Available in fully welded or bolt-together configurations to suit diverse site needs and streamline setup and relocation.
- **Effortless Handling** - Built to accommodate pipes from 2" to 26" in diameter, Allegiant pipe racks are engineered for efficient handling, supporting smooth operations and storage management.
